

WOW garden

1. Mark the area for the WOWstructure.
2. Remove the top layer of soil, level, and smooth the ground where the prefabricated structure will be placed. Apart from leveling and smoothing, the ground does not require additional preparation.
3. Lay the geotextile fabric on the ground in such a way that it covers an area larger than the base of the WOWstructure.
4. Place the structure on the prepared geotextile fabric, ensuring that the fabric extends approximately 10 cm around the outline of the structure.

Included in the set
Prefabricated
WOWstructure x 1 piece

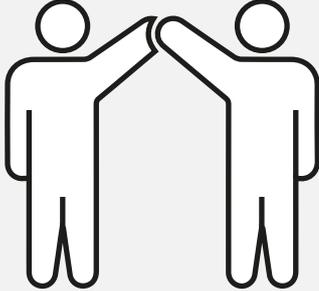

Auxiliary materials
not included in the set

Geotextile fabric

Garden soil

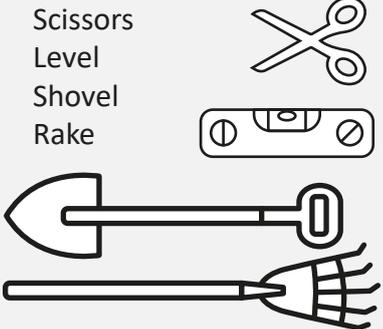

It is best to assemble the structure with two people

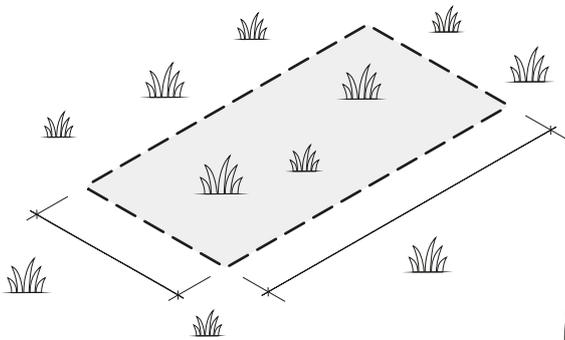

Auxiliary materials
not included in the set

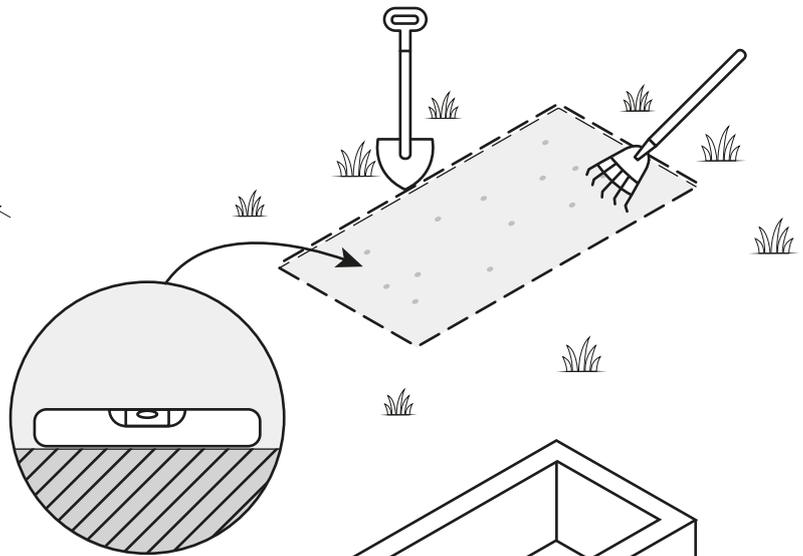

- Scissors
- Level
- Shovel
- Rake

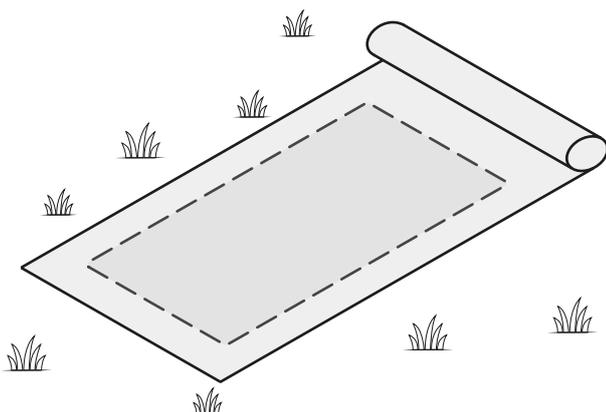

1.

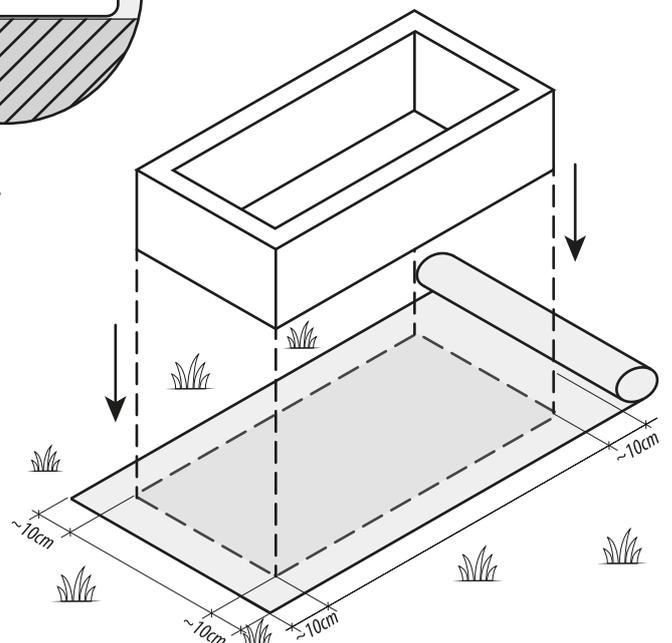

2.

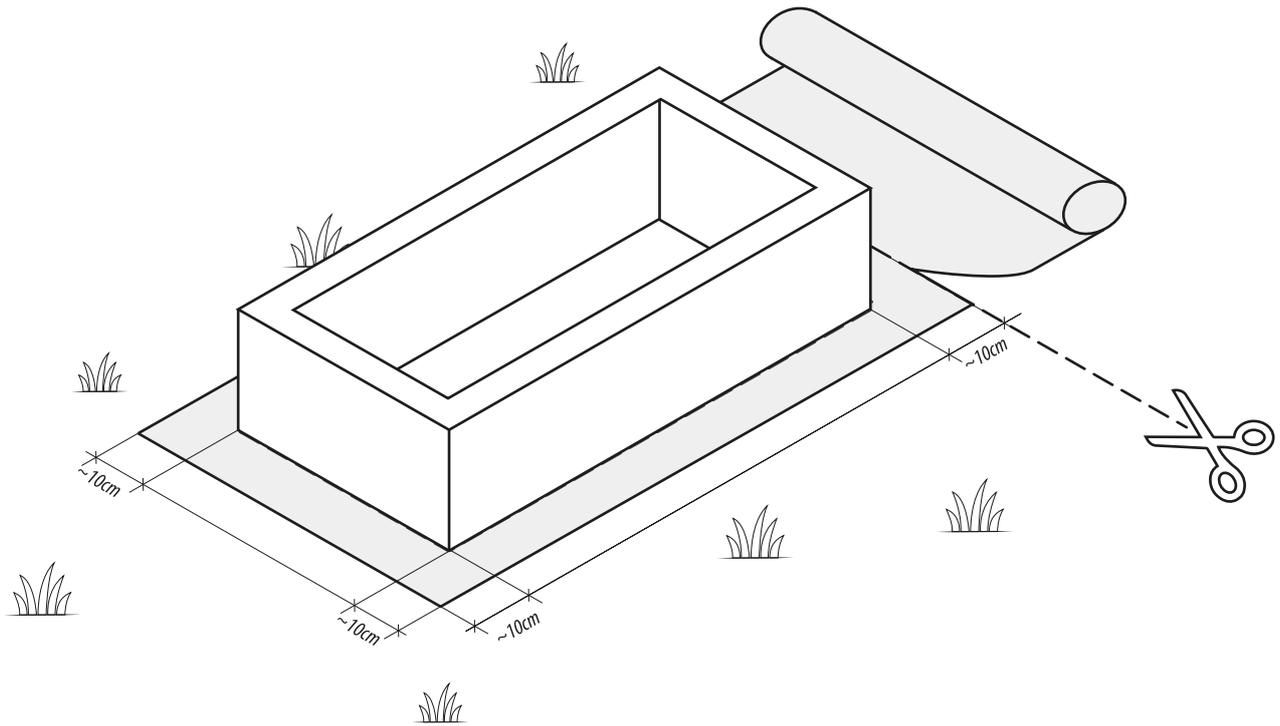

3.

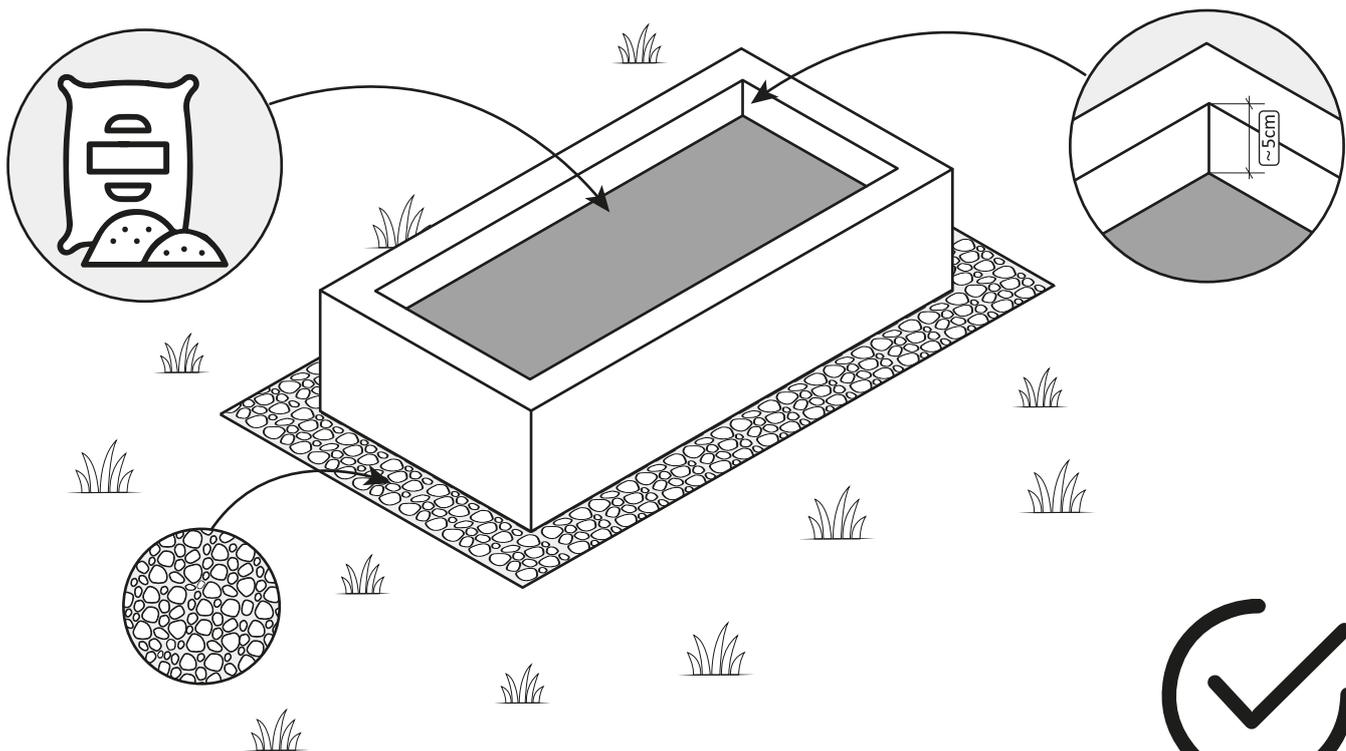

4.

5. Excess geotextile fabric can be trimmed off.

6. Fill the interior of the WOWstructure with garden soil, up to about 5 cm below the top edge of the structure, using soil suitable for the intended plantings. Around the structure, cover the geotextile fabric with a layer of decorative gravel. Alternatively, you can use another form of ground finishing around the structure, such as paving stones, which will ensure ease of maintaining the aesthetics and cleanliness of the structure.

DONE!
